

CRITICAL ROAD NEEDS TOLD TO GOVERNOR BY AN

School bells will be ringing for over 1,000,000 Florida school children the first week in September. Many of these children will be starting a new era in their lives by attending school for the first time. They will not be accustomed to crossing streets, watching out for cars or looking out for their safety.

Parents are urged to teach and stress safety before the child starts to school. He should be shown and instructed to take the nearest and safest route to and from school, and to cross at intersections where there is a traffic light when possible. If the child rides a bicycle, the parents should be sure he knows and practices Safe Riding habits.

The largest number of children killed in traffic accidents are in the 5-14 age group. For the first 7 months of this year, 133 children 16 years of age and under have been killed by motor vehicles in Florida. Many more were injured. A number of small children have been killed in their driveways. Drivers should walk around the car before getting in to make sure no child is under or in back of the car.

The Florida Safety Council urges drivers to use caution when driving near schools, especially when school opens in the morning and at the time school is dismissed.

Children are not thinking about accidents, so it is up to the driver to think for them. WATCH OUT FOR THEM.

'63 Sugarcane Acreage Application Deadline Set For September 7th

September 7 is the deadline for growers who did not produce sugarcane in 1960-62 to apply for a new farm proportionate share for the 1963 sugarcane crop, according to O. P. McArthur, State Executive Director, Agricultural Stabilization and Conservation Service. All growers who plan to produce sugarcane in 1963 for the first time must apply for a new-producer share in order to be eligible for an acreage allotment for the 1963 crop year.

Applications from all new growers in Florida, must be filed at the Glades-Landry Agricultural Stabilization and Conservation Service (ASCS) County Office in Moore Haven, Florida. Ray Gaskin, County Office Manager, has announced that applications will be received beginning Tuesday, August 28. The ASCS County Office is located in the Glades County Courthouse in Moore Haven.

'63 Sugarcane Acreage Application Deadline Set For September 7th

The USDA announced on August 21 that the 1963 sugarcane acreage in Florida and Louisiana will be restricted through proportional shares because of the tremendous expansion in the sugarcane acreage in the past three years. Further expansion could lead to a surplus of marketable sugar in the area.

The initial allotment for each farm in the area with established acreage history will equal the larger of the 1962 crop acreage or 105 percent of the average acreage for the farm for the 1960-62 crop years. Relatively small acreages are available for new-producer shares of up to 25 acres each on farms which do not have records of sugarcane acreage for 1960-62.

New growers are cautioned not to overlook the September 7 deadline for filing applications.

Uncle Dan from Doolie Says:

DEAR MISTER EDITOR:

I see by the papers where Secretary Dillion that carries the keys to the money box in Washington has final got around to flying the official shuttle for the 1962 fiscal year. He says we come up 6 billion short this time around on account of this being the 26th time we been short in the last 29 years, I reckon some papers didn't even mention it. I just setting the figure right down in case my banker thinks I'm the only one short-around here.

Quite a spell now the most popular thing coming out of Washington news stories is the words "billion dollars." It's a billion dollars here and a billion dollars there and a billion dollars everywhere. It's got so it's hard for Washington reporters to get through

ington. He allows as how things is "always a riot of oars along the Potomac." He says the lawns is green, the sailors is dressed in white, the children boys is wearing uniforms and the Government is running around in the red. Yep, I reckon things is right colorful along the Potomac.

Well, it appears the Estes hearings will last out another clock year. When you git this case boiled down, it looks like they got him charged with gitting money for putting fertilizer that didn't exist in storage tanks he never built. Maybe, Mister Editor, he was putting this fertilizer that didn't exist on them crops the Government pays farmers not to grow. I'm a little confused, can't figure out which one ought to be the defendant in this case.

I bring this item up at the country store Saturday night and Ed Doolie was of the opinion that if Estes had put the non-existent fertilizer in surplus and the non-existent storage tanks in the Soil Bank, everything would be legal and he could appeal his case to the United Nations. Personal, Mister Editor, if I ever git un confused just once, I'm going to quit reading the newspapers.

Yours truly,
Uncle Dan

Boat Safety Tips By City Red Cross

As millions of Americans are taking to the water in power boats, the Red Cross is still "accentuating the negative" in boat safety tips with its trio of DON'Ts. Martin Letts, Director Safety Services of the Palm Beach County Red Cross, declared today.

"Boating enthusiasts of Palm Beach County will be safer on the water if they heed these 'Don'ts,' he said. They are:

DON'T OVERLOAD. Keep your passengers down to a safe number.

DON'T OVERPOWER. Your motor should not be too big for your boat. If you don't know their right size, consult your boat dealer.

DON'T OVERLOOK. Two REQUIRED items of equipment are lights and life jackets — one of the latter for every passenger. Other recommended items for boats under 16 feet are oars, a spare can of gasoline, a fire extinguisher, anchor with line attached and extra line, a first aid kit, and a whistle to signal for help if you get in trouble.

Rogers, Fritz Stein, Jr. PAHOKEE — CANAL POINT COMMUNITY Bruce Bittling, Louis Davis, Milton Douglas, Luke Frazer, Lewis Friend, Hilton Jones, J. W. Repper, W. H. Webb, Jr., Edgar Wilder, Charles D. Wilkins.

To be elected from each community are three regular, committee members and two alternates who will serve for one year, beginning October 1, 1962. The chairman and members of the elected ASC community committees will also serve as delegate and alternate delegates, respectively, to the county convention where the county ASC committee will be chosen.

Questions on eligibility to vote and to hold office will be determined by the county committee, subject to appeal to the State committee. Generally, an eligible voter must be a bona fide farmer or farm owner who is eligible to take part in one more of the programs administered by the USC county and community committees.

Uncle Dan from Doolie Says:

DEAR MISTER EDITOR:

I see by the papers where Secretary Dillon that carries the keys to the money box in Washington has final got around to fixing the official shortage for the 1962 fiscal year. He says we come up 6 billion short this time around. On account of this being the 26th time we been short in the last 29 years, I reckon some papers don't even mention it. I'm just setting the figures down in case my banker thinks I'm the only one short around here.

For quite a spell now the most popular thing coming out of Washington news stories is the words "billion dollars." It's a billion dollars here and a billion dollars there and a billion dollars everywhere. It's got to be hard for them Washington reporters to get through.

Well, it appears the Estes hearings will last out another fiscal year. When you get this case boiled down, it looks like he got him charged with giving money for putting fertilizer that didn't exist in storage tanks he never built. Maybe, Mister Editor, he was putting this fertilizer that didn't exist on them crops the Government pays farmers not to grow. I'm a little confused, can't figure out which one ought to be the defendant in this case.

I bring this item up at the country store Saturday night and Ed Doolittle was of the opinion that if Estes had put the non-existent fertilizer in surplus and the non-existent storage tanks in the Soil Bank, everything would be legal and he could appeal his case to the United Nations. Personal, Mister Editor, if I ever get unconfused just once, I'm going to quit reading the newspapers.

Yours truly,
Uncle Dan

I sure was glad to receive the good "Old Paper" (The B. G. Herald). The paper makes a person who has been away for awhile feel like he is right at home. I have gotten out of the local hospital and am recovering in good shape at home. In the following lines, I will try to tell you a little about this place. This place is located about 4 miles from Leesburg, Va. and about 45 miles from Wash. D. C. The farm has about 3,500 acres. We also have another 500 acres about 8 miles away. And we also rent another 400 acres. There are 9 houses and 6 barns, not counting the bull barn and the horse barn on this farm. We grow all the hay and silage that is used in the winter. We also grow oats, corn, corn of this is used here on the farm. We have commercial and purebred hereof cattle here.

Mr. Godfrey also has a "Deer Park" which is 400 acres of woods.

In the Deer Park there are 19 head of buffalo, elk, a deer, a man stag, some deer from Japan, and a llama. The park is all fenced in and has locked gates. We also have about 100 head of quarter horses. We train these horses to work cattle and to play polo with them. There is a good market for these types of horses in this part of the country. The weather has been real cave most of the time but we have very little rain.

I hope this will give you an idea of the type of place this is. Keep up the good work you are doing with the paper, I am you will with the fine staff of help you have.

Yours Truly
David W. Anderson

More than 350 beauty experts will meet in Orlando, September 21, to discuss giving Florida a face-lift.

The event will be an all-Florida conference of the beautification committee of the Florida State Chamber of Commerce. The one-day session will be held in the Ocean Plaza Hotel from 9 a.m. to 4 p.m.

H. O. Martin of Lakeland, chairman of the committee, said the conference will be attended by representatives of 14 associations and a number of individuals interested in beautifying the state.

"The idea of this program is to start an all-out beautification effort at local levels -- through municipalities and civic organizations -- and carry it out on a mass scale throughout the state with the assistance of governments, industry, business, the news media and beautification-minded groups who take pride in their state," Martin said.

Our Parks Manager Cunningham has already begun a program to plant Amaryllis, and other plants by individuals and organizations.

Cross State Cruise Will Mark 25 Years Waterway Service

The newly re-activated Okeechobee Waterway Association is furthering plans to celebrate the 25th Anniversary of south Florida's Cross-State Okeechobee Waterway November 15-17 with a dramatic boat-a-Cade starting at the Atlantic Ocean and finishing at the Gulf of Mexico.

This trip right across the state of Florida is similar to the cross-state cruise back in 1937 that signaled the opening of the 125 nautical mile waterway.

While plans are in a formative stage at this time, the objective is to produce a Boat-a-Cade of unusual size and color, and one that dramatizes the multiple recreational and commercial uses of the Waterway.

Owners of large yachts in 50-foot and up category already have promised to participate. Smaller cruisers will enter, too, and a substantial part of the fleet. Outboard Clubs and individual owners will be invited.

Commercial interests will enter tug boats and barges, one laneing craft will make the trip. Shrimp boats regularly use the Waterway to take loads for Cape Canaveral pier the waters. The burgeoning sugar industry of the Belle Glade-Clewiston area ships heavy tonnage. A picturesque stern-wheeler is developing plans to run a passenger excursion across state as part of the celebration.

Coast Guard Auxiliary, Naval Reserve, U.S. Engineer and other elements regularly using the Waterway will be asked to join. It is hoped that marine

ed with his father in the plumbing business and is taking a course for heavy equipment operator.

The newweds are making their home at 16 N.W. Ave. H, Belle Glade.
